

## COVID Update, March 11<sup>th</sup> 2022

Happy almost Spring! As always we have been monitoring the COVID numbers and latest CDC guidelines as we make the best decisions for our community. Because numbers have dropped significantly and the CDC has changed the way they assess risk putting our area at low risk, we have made masks optional for vaccinated individuals for all services and programming, including children and youth formation. Also, standalone air filters have been installed in 5 of our classrooms to bring the air quality up to the best levels for our children. Although restrictions are easing, we will continue to stay vigilant so that we can make any necessary changes. If you have any questions, please contact our Junior Warden, Krista Gauthier, at [kkgauthier@gmail.com](mailto:kkgauthier@gmail.com). Thank you!
